

Project Demo Planning

Date	04 July 2026
Team ID	
Project Name	Smart Lender-AI Based Loan Eligibility Prediction System
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S. No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the project objectives, problem statement, and the need for AI-based loan eligibility prediction.	2	keerthi
2	Dataset & Model Overview	Explain the dataset, preprocessing steps, feature selection, and the machine learning model used.	3	keerthi
3	Live Application	Demonstrate the Streamlit application by entering applicant details and predicting whether the application is approved or rejected.	5	keerthi
4	Results & Visualizations	Show prediction results, feature importance, data visualizations, and model performance metrics (Accuracy, Precision, Recall, F1-Score).	3	keerthi
5	Conclusions & Future Scope	Summarize the project, discuss future enhancements, and answer questions.	2	keerthi

Demo Flow Summary:

Step	Activity	Notes
------	----------	-------

1	Introduction & Problem Statement	Explain the challenges in manual loan approval and the objective of using Machine Learning for faster, accurate, and unbiased loan eligibility prediction..
2	Solution Overview	Describe the dataset, data preprocessing, feature engineering, machine learning model, and Streamlit interface.
3	Live Feature Demonstration	Enter sample applicant details (or upload a dataset), predict credit card approval status, and display the prediction along with visualizations.
4	Q&A Session	Answer questions about the dataset, machine learning model, evaluation metrics, technologies used, and future improvements.
